

Geothermal ERA NET Meeting
Offenburg, Germany
4 March 2015

# Financial Instruments and Funding of R&D and Geothermal Projects

Baldur Petursson
Sigurður Björnsson
Gunter Siddiqi

## Overview of the presentation

Objectives and structure of the project

Funding of geothermal projects

Funding of R&DD in geothermal projects

## Overview of the presentation

Objectives and structure of the project

Funding of geothermal projects

Funding of R&DD in geothermal projects

## The Overall Objective

- To improve the synergies between different players
- Better understanding of this financial landscape to highlight barriers and recommend practical solutions

 Knowledge exchange will <u>enhance cooperation</u> and lower barriers and improve joint programming and <u>better funding</u> instruments and opportunities.

## **Process description**

 Analyse the financial instruments that are available and – and map the operational structure of the different national funding bodies

 Highlight the <u>main barriers and opportunities</u>, and how these instruments can <u>more easily work together</u>

### The Team – 10 Countries

### **Steering Committee**

	Country:	Person in charge:
Leader 1: A	Iceland/Rannis	Sigurdur Bjornsson
Leader 1: B	Iceland/OS	Baldur Petursson
Leader 2:	Switzerland	Gunter Siddiqi

### **Participants**

	Country:	Person in charge:
Partner 1:	The Netherlands	Ramsak/Breembroek
Partner 2:	Portugal	Mathilde Cunha
Partner 3:	Germany	Stephan Schreiber
Partner 4:	Slovakia	Igor Kosic
Partner 5:	Hungary	Annamaria Nador
Partner 6:	Turkey	Kaan Karaoz
Partner 7:	Italy	Adele Manzella
Partner 8:	Slovenia	Andrej Lapanje

## **Aims, Outputs and Priorities**

### **Activities and Deliverables**

#### Activities

- Coordinated desk research meeting with experts collection of data from countries
- Evaluation of existing instruments and national markets
- Working meetings e.g. with stakeholders regarding relevant topics
- Drafting report
- Evaluation of option regarding possible Joint Call

#### Deliverables

- Report Recommendations for financial instruments for the development of geothermal R&D and for the development of geothermal projects in Europe.
- Conclusion Seminar Barriers & Opportunities and Policy recommendation.
  - National research funding
    - Needs –Barriers Opportunities and Policy recommendation.
  - Financial funding for geothermal projects
    - Needs –Barriers Opportunities and Policy recommendation
- Implementation of Joint Call

## Process description – draft timing

### **Timing**

	April	May	June	July	August	Sept	Oct
Preparation and planning							
Coordinated – desk research							
Working Process							
Group Meetings							
Working meetings with stakeholders							
Additional items							
Conclusion seminar/workshop							

## Overview of the presentation

Objectives and structure of the project

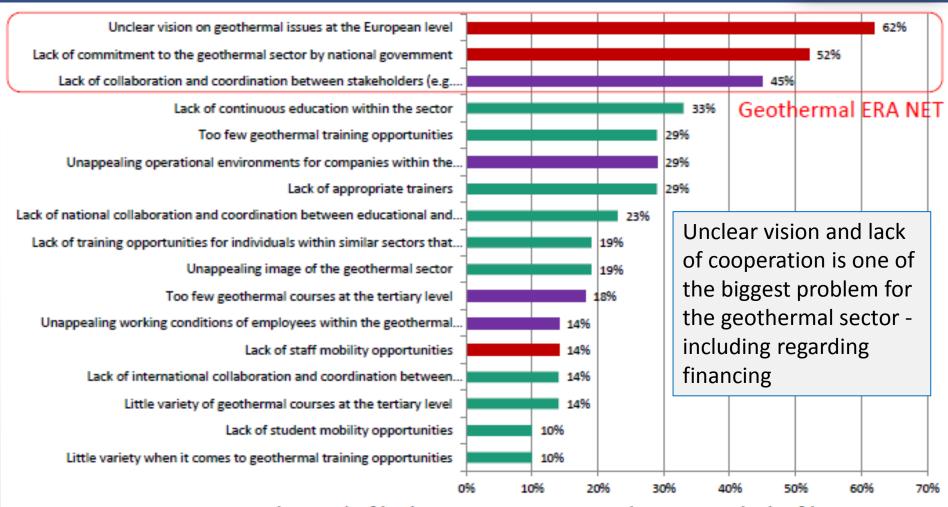

Funding of geothermal projects

Funding of R&DD in geothermal projects

### The Main Geothermal Problems

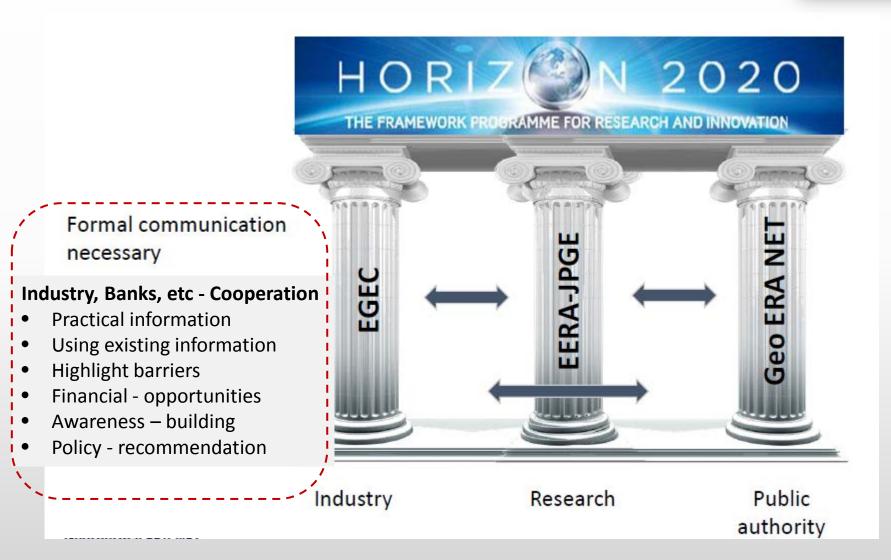

Geothermal ERA NET Coordination Office Orkustofnun, Iceland Factors deemed of high importance as contributors to a lack of human resources within the geothermal sector. Educational factors are coloured green, policy/sectorial factors red and industry factors purple

## The three pillars of the EU Geo Policy

### **Geothermal Financial Barriers - EGEC**

## Barriers to Geothermal Development District Heating

#### Financial barriers

- Risk associated to the first drilling and its coverage;
- Capital intensive (2,2 Mio € / MWth);
- Need new business models to make GeoDH economically viable;
- Fragmented and very limited support financial support; unfair competitive with conventional sources

### **Geothermal Financial Barriers - GeoDH**

#### PHASE I PHASE 2 PHASE 3 Dissemination Socio-Economical Prospective for Geothermal DH Conditions Promotion of geothermal DH Potential Study Financing geothermal DH projects Resource Assessment Best practices Regulatory conditions Training courses Source: GeoDH **Attracting more financing Awareness raising Transfer of best practice**

## How can we scale up Geothermal Financing? Global view – WB / IFC

### Sponsors

- Geothermal Expertise
- Local knowledge
- Financial Resource
- Scale to be able to finance on a corporate/por tfolio basis

Source: IFC

### Regulatory / Sector Framework

- Transparent, predictable and sustainable
- Geothermal Incentives
- Standardized contracts
- Public role in bearing geothermal resource risk?

### Scaling up Geothermal Financing

### Technologies

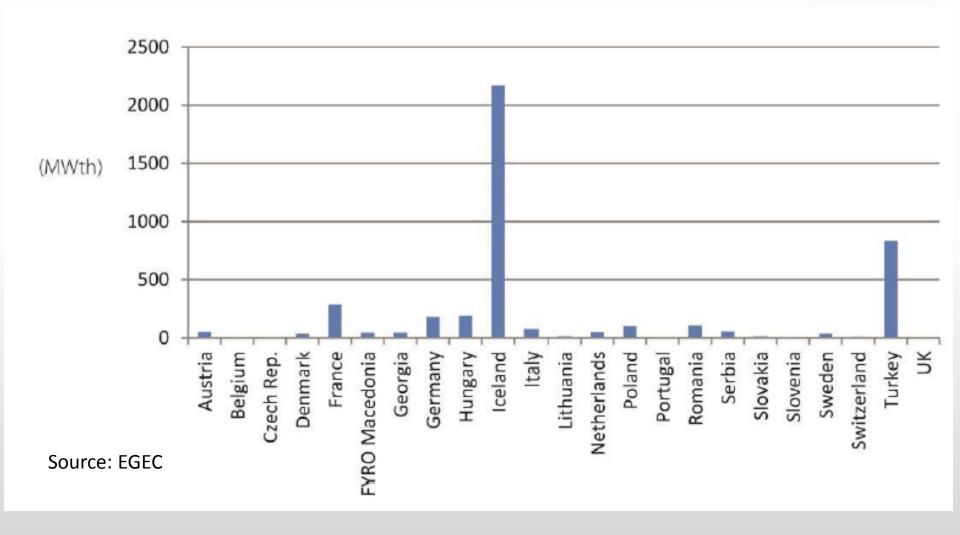

- More accurate and faster resource assessment
- > Faster and less costly drilling
- Reduction in US\$ per MW and equipment lead-time

#### Lenders

- ➤ In-house resource engineer (or close collaboration with outside resource consultant)
- Geothermal financing experience
- Creativity and innovation

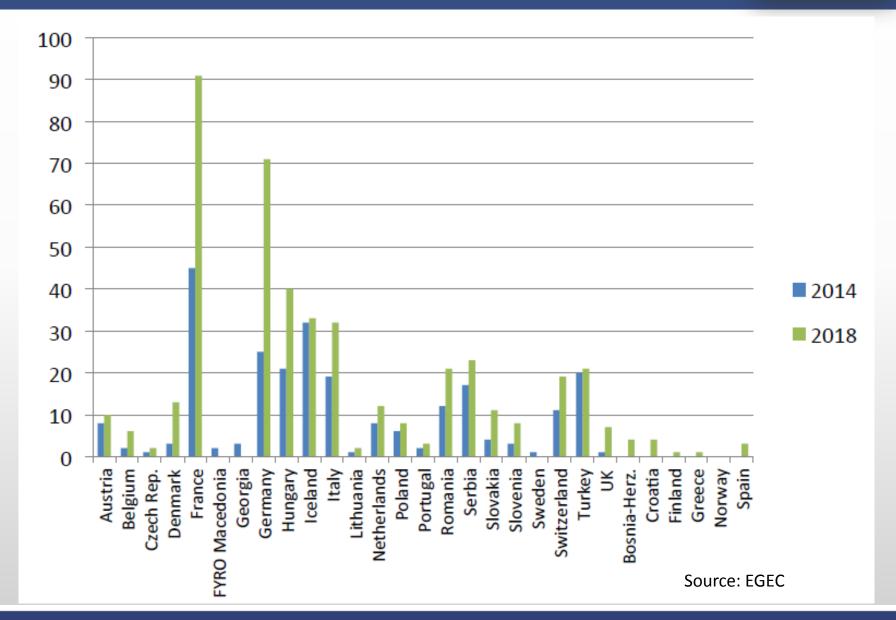

## Geothermal DH capacity Installed in Europe, 2013 (MWth)

## Number of GeoDH systems in Europe potential possibilities

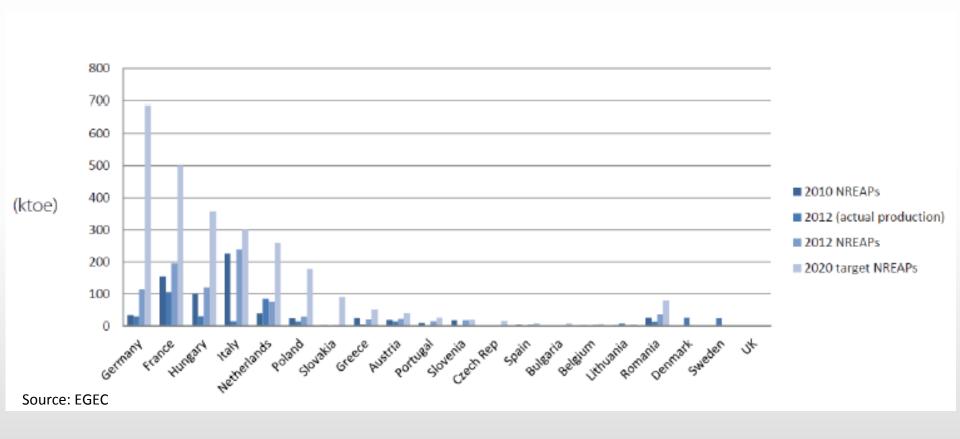

## **Geothermal DH Potential in Europe**

**Actual Geothermal DH production towards the 2020 target (ktoe)** 

## Overview of the presentation

Objectives and structure of the project

Funding of geothermal projects

Funding of R&DD in geothermal projects

### Increasing focus on the overall process

Support to H/C in the H2020 energy challenge: from R&D to implementation

**ERA NET** 

R & D **Projects** 

Commercial R&D Application

Project intention & planning

**Detailed** financing

Investments design & Procurement contracts

From R&D to commercial application (EE-13, LCE-2, LCE-3)

Working with market actors -> decision making (EE14, LCE4)

Project development assistance to public and private project promoters (EE20)

Support to all these stages is provided under the EC **H2020 Energy Challenge via Call for Proposals** 

## The Geothermal R&DD Challenges

### Where is H/C in the H2020 energy challenge?

## Energy efficiency

- Buildings, consumers, products
- Industry heat recovery (EE18)
- Heating and Cooling (EE-13, EE-14)
- Finance for sustainable energy

## Smart Cities and Communities

- SC&C solutions integrating energy, transport and ICT sectors – lighthouse projects (SCC-1)
- others

### Low Carbon Energy

- RES E and H/C technologies (LCE-2, LC-3, LCE4)
- Energy storage
- Sustainable bio fuels
- others

H/C is included in a number of topics of the Energy Challenge

Actions supported go from R&D to market uptake and include DHC

## The Geothermal R&DD Challenges

### Topic EE 14: Removing market barriers to the uptake of efficient H/C

### 1. SPECIFIC CHALLENGES

Action is needed to remove non-technological (including legislation) barriers to exploit the full potential of efficient H/C

### 2. SCOPE

A number of areas relate to **DHC**, for example:

- Identifying, developing, and promoting new markets for the recovery of heat from industry
- For district heating and cooling industry
  - improve the transparency of the market and increase consumer trust
  - exchange of information, best practice examples, consumer practices, motivations and barriers
- Heating and cooling planning

## The Geo - Technical & Regulatory Barriers

## Barriers to Geothermal Development District Heating

#### Technical barriers

- Lack of wide and detailed information on geothermal energy resources
- Renovation of DH

#### Regulatory barriers

- Lack of national/regional/local geothermal regulatory framework
- Length and administrative burden of licensing procedures for exploration and drilling;
- Management of cascade uses

## The Geothermal ERA- Opportunities

## Conclusion: 3 Factors Affecting Geothermal District Heating

## Challenges of funding R&D projects

## Outputs: Increased knowledge, cooperation, utilization and effectiveness of geothermal funding for R & D activities.

- Priority 1: Mapping of funding policy and regulatory framework for geothermal R&D activities.
- Priority 2: Highlight barriers and policy opportunities of geothermal R&D activities.
- 1. Achieve knowledge regarding the various national research policies related to geothermal energy in European countries.
- 2. Present and discuss the handling of national research funding workflows starting at funding opportunity announcements, grant applications, evaluation processes, and award processes.
- 3. Share experiences on strengths, weaknesses, opportunities and threats of national funding programs vis-à-vis the national needs.

## Funding Research and Innovation Goal: Delivering technology to enable commercial readiness

		CRI			
•	nponent technology L) and their correlation	6	Bankable Asset Class		
to commercial readi	•	5	Market competition driving widespread deployment		
		4	Multiple Commercial Applications		
System test,	TRL	3	Commercial Scale Up

### Funding for Research and Innovation

(free) Fundamental research

Oriented Fundamental research Application orietned Fundamental reserach

Prototype development Pilots and demo

Market

Universities(via Swiss National Fund SNF and

Cantons) - 0.5 million

ETH-Domain - 1 mln

Unis of Applied Sciences - < 0.1 mln

Private sector

SNF - 1.5 mln

Comm for Tech. & Innov. - 0.2 mln

Swiss Federal Office of Energy – 3.5 mln

- Legal basis
- Dedicated /

general funding

Ability to fund

activities abroad

- Call process
- Selection process
- Award process
- Reporting
- Quality control
- Assessment of impact

Typical figures – annual funding in Fr. / € mln

## **ERA NET - Enjoyable Work Ahead**

#### **Communicate** with principal **stakeholders** and others

Gaining expert knowledge – on financial barriers and opportunities

Prepare Policy Recommendation for better Financial Framework and more Capital for Geothermal Activity

Prepare and Implement Joint Financial Geothermal Activities (e.g. transnational funding activities)
