

Joint Activity Proposal

Eugenio Trumpy, Adele Manzella
CNR

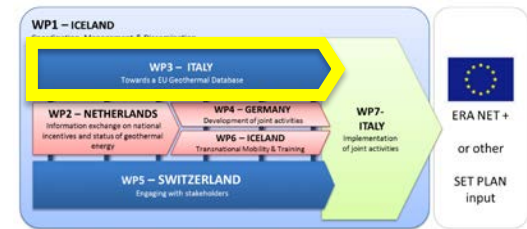

WP4/WP7 – Implementation of Joint Activities:

Background

1. Specifically mentioned in the EU Commission Call [Topic ENERGY.2011.10.2-2, FP7-ERANET-2011-RTD] which led to the current GEO ERA-NET Project
2. The work package 3 is dedicated to the preliminary work for implementing a European Geothermal Information Platform (EGIP)
3. The tasks 3.2 and 3.3 were aimed to analyze the state-of-the-art and the needs regarding geothermal information and existing IT-Tools to manage a geothermal information system, (see D3.1)
4. study the feasibility for the realization of an EGIP, (see D3.2). Afterword a joint activity has been proposed and carried out to prove the effectiveness and efficiency of EGIP

WP4/WP7 – Implementation of Joint Activities:

Background II

5. EGIP pilot implementation as Joint Activity, April – September 2014 with Italy, France, Hungary, Switzerland, Iceland, Slovenia
6. EGIP Pilot unveiling at GeoERA-NET – EERA-JPGE joint meeting – Trieste - September 2014
7. Geo ERA-NET project assemble firstly (September 2014) and the Supervisory Board secondly (December 2014) established that a further step of EGIP evaluation would be needed
8. Tuning EGIP JA proposal
9. Submitted paper at International Journal of Digital Earth
03/03/2015

WP4/WP7 – Implementation of Joint Activities:

Target Group

- ❑ Participants: Experts, Project developers, Industry, Research
- ❑ for Results: to be defined by the JA

Aims

Identification of:

- what problems EGIP should solve
- who should use EGIP
- assess the EGIP necessity
- prepare a possible joint call for the complete EGIP implementation

WP4/WP7 – Implementation of Joint Activities:

Tuning EGIP

- ✓ Analysis of the boundary conditions for the complete implementation
- ✓ including the evaluation of possible joint calls for its complete realization

- ❖ based on the experience learned from the Pilot Project
- ❖ focused on effective needs, impacts and benefits that EGIP must have
- ❖ set up a Working Group of experts and stakeholders
- ❖ 7 actions are planned

WP4/WP7 – Implementation of Joint Activities:

Tuning EGIP

Every EGIP JA member:

1. identifies their national stakeholders (plus suggest international stakeholders, as maybe EU or IEA bodies...)
2. will put together the detected stakeholders and will identify their representative key stakeholders to invite at the Workshop/RoundTable
3. will organize a common and shared survey, the questionnaire (we can think to setup a web survey)
4. will present EGIP, its Pilot and the questionnaire to their identified stakeholders and gets back feedback (The presentation could be a physical meeting, a teleconference with online presentation, or an e-mail with explanations and link to EGIP Pilot)

Actions:

WP4/WP7 – Implementation of Joint Activities:

Tuning EGIP

5. The EGIP JA will organization a Workshop/RoundTable to present, comment and analyse the results of the survey (at the workshop/Round table would be good to invite key stakeholders on behalf of the main groups and trans-European experts, e.g., from US National Geothermal Data System, New Zeland, ...)
6. update of the feasibility study (D3.2) based on the Workshop/RoundTable feedbacks
7. write a possible joint call on EGIP implementation

e.g.,

New Zeland
Geothermal Use
Database

WP4/WP7 – Implementation of Joint Activities:

JA Participants:

National Research Council of ITALY

Swiss Federal Office of Energy (with Swiss Geological Survey)

Bureau de Recherches Géologiques et Minières - FRANCE

Magyar Foldtani és Geofizikai Intézet – HUNGARY

OS Orkustofnun – ICELAND

Slovenia Geological survey

Classification of Joint Activity: JA1 which can develop into **JA3**

Start date: 15/03/2015 **Kick-off:** 15/04/2015 **End:** 09/2015 **Duration:** possibly 13 months

WP4/WP7 – Implementation of Joint Activities:

Tuning EGIP timing

	2015						
	March	April	May	June	July	Aug	Sept
Identification of National and Trans-National stakeholders							
Organization of the questionnaire							
Conference call: all JA participants - Overall list of the stakeholders defined at national level and identification of representative stakeholders at workshop/RoundTable							
Presentation of EGIP, its Pilot and the questionnaire to the identified stakeholders and gets back feedback							
Workshop/Roundtable				???			???
Geothermal ERA-NET meeting - Bruxelles							

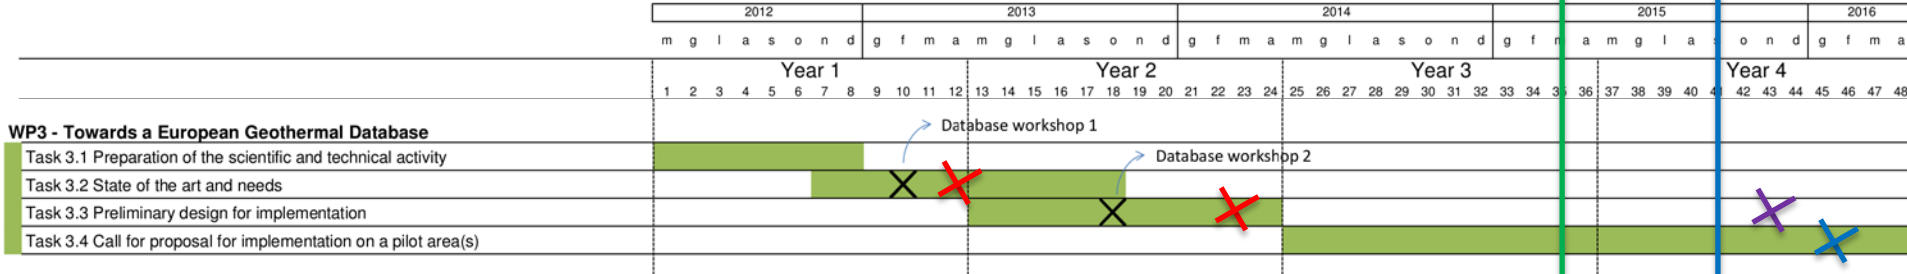

WP3 Towards a European Geothermal Information Platform

was: WP3 Towards a European Geothermal Database
 lead partner: National Research Council of Italy (CNR)

NOW
 Start JA

END of
 JA

- Start month 1
- End month 48

D3.1 - first deliverable scheduled for [M10] > delayed [M12]
 D3.2 - second deliverable scheduled [M18] > delayed [M22]
 D3.2 - second deliverable update [M43]
 D3.3 - third deliverable scheduled [M45]

WP4/WP7 – Implementation of Joint Activities:

WP3 Towards a European Geothermal Information Platform

From grant agreement – Annex I

Task 3.4 Following-up the implementation (from annex 1)

The preliminary design will be used to prepare a **call for proposal** to implement the European Geothermal platform through one or more **pilot area(s)**.

The choice of the field, of the data, and the demonstration scenario will be crucial to demonstrate the usefulness and the capabilities of the European geothermal database.

•**D3.3 Report on the implementation of the European Geothermal Information Platform** : [month 45]

Original

WP4/WP7 – Implementation of Joint Activities:

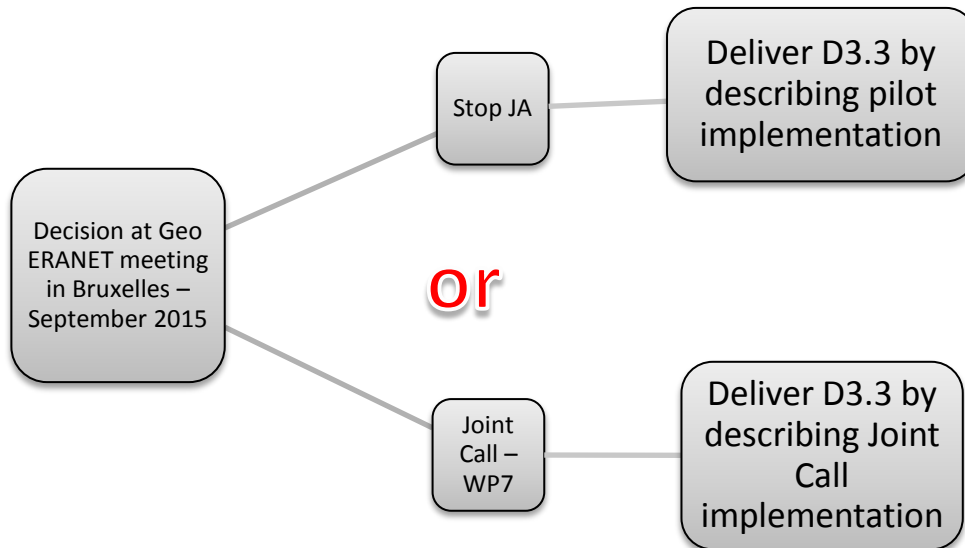

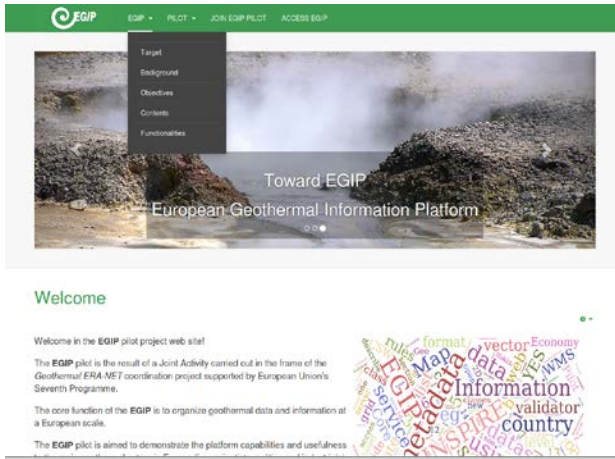

Task 3.4 / WP4 & WP7

WP4: Tuning EGIP JA – end in September 2015 [M41]

After September, we propose:

- to update the report D3.2 on the base of the JA results [M43] **and**
